Development comparison: coverage, charged work and proof size
A. Coverage across all 66 development profiles
Certified profiles (%)
Method-specific work allowance
Legacy direct
Goal-pruned direct
Original refinement
Shared lifting
B. Solver work at allowance 100,000
Method-specific operations (all 66 profiles)
4292
3382
14518
46840
Legacy
Pruned
Refinement
Shared
C. Independently accepted proof representation
Canonical JSON bytes (54 certified profiles)
20064
19880
27248
27248
Legacy
Pruned
Refinement
Shared
D. Existing development families at allowance 256
Certified profiles (%)
Goal-pruned direct
Shared lifting
argument product
correlated frames
horizon boundary
layered reconvergence
off goal load
